Contents

Preface *page* xiii
Notation *page* xv

1. Introduction 1
   1.1. Approximate Statistical Procedures 1
   1.2. Asymptotic Optimality Theory 2
   1.3. Limitations 3
   1.4. The Index n 4

2. Stochastic Convergence 5
   2.1. Basic Theory 5
   2.2. Stochastic o and O Symbols 12
   *2.3. Characteristic Functions 13
   *2.4. Almost-Sure Representations 17
   *2.5. Convergence of Moments 17
   *2.6. Convergence-Determining Classes 18
   *2.7. Law of the Iterated Logarithm 19
   *2.8. Lindeberg-Feller Theorem 20
   *2.9. Convergence in Total Variation 22
   Problems 24

3. Delta Method 25
   3.1. Basic Result 25
   3.2. Variance-Stabilizing Transformations 30
   *3.3. Higher-Order Expansions 31
   *3.4. Uniform Delta Method 32
   *3.5. Moments 33
   Problems 34

4. Moment Estimators 35
   4.1. Method of Moments 35
   *4.2. Exponential Families 37
   Problems 40

5. M- and Z-Estimators 41
   5.1. Introduction 41
   5.2. Consistency 44
   5.3. Asymptotic Normality 51

Downloaded from https://www.cambridge.org/core. Library African Studies Centre, on 15 Apr 2021 at 14:02:03, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/CBO9780511802256

*5.4. Estimated Parameters 60
5.5. Maximum Likelihood Estimators 61
*5.6. Classical Conditions 67
*5.7. One-Step Estimators 71
*5.8. Rates of Convergence 75
*5.9. Argmax Theorem 79
Problems 83

6. Contiguity 85
6.1. Likelihood Ratios 85
6.2. Contiguity 87
Problems 91

7. Local Asymptotic Normality 92
7.1. Introduction 92
7.2. Expanding the Likelihood 93
7.3. Convergence to a Normal Experiment 97
7.4. Maximum Likelihood 100
*7.5. Limit Distributions under Alternatives 103
*7.6. Local Asymptotic Normality 103
Problems 106

8. Efficiency of Estimators 108
8.1. Asymptotic Concentration 108
8.2. Relative Efficiency 110
8.3. Lower Bound for Experiments 111
8.4. Estimating Normal Means 112
8.5. Convolution Theorem 115
8.6. Almost-Everywhere Convolution Theorem 115
*8.7. Local Asymptotic Minimax Theorem 117
*8.8. Shrinkage Estimators 119
*8.9. Achieving the Bound 120
*8.10. Large Deviations 122
Problems 123

9. Limits of Experiments 125
9.1. Introduction 125
9.2. Asymptotic Representation Theorem 126
9.3. Asymptotic Normality 127
9.4. Uniform Distribution 129
9.5. Pareto Distribution 130
9.6. Asymptotic Mixed Normality 131
9.7. Heuristics 136
Problems 137

10. Bayes Procedures 138
10.1. Introduction 138
10.2. Bernstein–von Mises Theorem 140

Downloaded from https://www.cambridge.org/core. Library African Studies Centre, on 15 Apr 2021 at 14:02:03, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/CBO9780511802256

10.3. Point Estimators 146
*10.4. Consistency 149
Problems 152

11. Projections 153
11.1. Projections 153
11.2. Conditional Expectation 155
11.3. Projection onto Sums 157
*11.4. Hoeffding Decomposition 157
Problems 160

12. U-Statistics 161
12.1. One-Sample U-Statistics 161
12.2. Two-Sample U-statistics 165
*12.3. Degenerate U-Statistics 167
Problems 171

13. Rank, Sign, and Permutation Statistics 173
13.1. Rank Statistics 173
13.2. Signed Rank Statistics 181
13.3. Rank Statistics for Independence 184
*13.4. Rank Statistics under Alternatives 184
13.5. Permutation Tests 188
*13.6. Rank Central Limit Theorem 190
Problems 190

14. Relative Efficiency of Tests 192
14.1. Asymptotic Power Functions 192
14.2. Consistency 199
14.3. Asymptotic Relative Efficiency 201
*14.4. Other Relative Efficiencies 202
*14.5. Rescaling Rates 211
Problems 213

15. Efficiency of Tests 215
15.1. Asymptotic Representation Theorem 215
15.2. Testing Normal Means 216
15.3. Local Asymptotic Normality 218
15.4. One-Sample Location 220
15.5. Two-Sample Problems 223
Problems 226

16. Likelihood Ratio Tests 227
16.1. Introduction 227
*16.2. Taylor Expansion 229
16.3. Using Local Asymptotic Normality 231
16.4. Asymptotic Power Functions 236

Downloaded from https://www.cambridge.org/core. Library African Studies Centre, on 15 Apr 2021 at 14:02:03, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/CBO9780511802256

16.5. Bartlett Correction 238
*16.6. Bahadur Efficiency 238
Problems 241

17. Chi-Square Tests 242
17.1. Quadratic Forms in Normal Vectors 242
17.2. Pearson Statistic 242
17.3. Estimated Parameters 244
17.4. Testing Independence 247
*17.5. Goodness-of-Fit Tests 248
*17.6. Asymptotic Efficiency 251
Problems 253

18. Stochastic Convergence in Metric Spaces 255
18.1. Metric and Normed Spaces 255
18.2. Basic Properties 258
18.3. Bounded Stochastic Processes 260
Problems 263

19. Empirical Processes 265
19.1. Empirical Distribution Functions 265
19.2. Empirical Distributions 269
19.3. Goodness-of-Fit Statistics 277
19.4. Random Functions 279
19.5. Changing Classes 282
19.6. Maximal Inequalities 284
Problems 289

20. Functional Delta Method 291
20.1. von Mises Calculus 291
20.2. Hadamard-Differentiable Functions 296
20.3. Some Examples 298
Problems 303

21. Quantiles and Order Statistics 304
21.1. Weak Consistency 304
21.2. Asymptotic Normality 305
21.3. Median Absolute Deviation 310
21.4. Extreme Values 312
Problems 315

22. L-Statistics 316
22.1. Introduction 316
22.2. Hájek Projection 318
22.3. Delta Method 320
22.4. L-Estimators for Location 323
Problems 324

23. Bootstrap 326

Downloaded from https://www.cambridge.org/core. Library African Studies Centre, on 15 Apr 2021 at 14:02:03, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/CBO9780511802256

23.1. Introduction 326
23.2. Consistency 329
23.3. Higher-Order Correctness 334
Problems 339

24. Nonparametric Density Estimation 341
24.1 Introduction 341
24.2 Kernel Estimators 341
24.3 Rate Optimality 346
24.4 Estimating a Unimodal Density 349
Problems 356

25. Semiparametric Models 358
25.1 Introduction 358
25.2 Banach and Hilbert Spaces 360
25.3 Tangent Spaces and Information 362
25.4 Efficient Score Functions 368
25.5 Score and Information Operators 371
25.6 Testing 384
*25.7 Efficiency and the Delta Method 386
25.8 Efficient Score Equations 391
25.9 General Estimating Equations 400
25.10 Maximum Likelihood Estimators 402
25.11 Approximately Least-Favorable Submodels 408
25.12 Likelihood Equations 419
Problems 431
